eVOLVE

What does downtime cost your business?

When data center downtime means lost business, eVOLVE is your lifeline. eVOLVE works with you to plan, design, build and maintain a cost-effective infrastructure solution for your mission-critical IT and business needs. As you grow, your needs change – and this is where we step in – involve eVOLVE .

From site planning to site monitoring, eVOLVE secures your data center in a foundation of reliability, mitigating risk and ensuring you a good night's sleep. We concern ourselves with proactive maintenance, maximizing uptime, connectivity and communication so you can focus on running your business and stop losing sleep over data center operations.

In today's marketplace, a sound IT infrastructure serves as the foundation for successful business operations. Our ability to adapt today's technologies to the unique requirements of your organization ensures that your foundation is strong. Balancing a robust, powerful infrastructure with unmatched IT ingenuity, eVOLVE provides support for the lifecycle of your data center.

A partner for the lifecycle of your data center.

eVOLVE is dedicated to delivering support throughout the lifecycle of your data center. Offering a single point of contact, we serve you from site auditing all the way through to project completion. And our commitment doesn't stop there. Even while your data center is functioning at peak performance, we

offer continued proactive preventative maintenance and monitoring services to eLERT™ you at the first sign of a potential problem. Not only do we protect you from unexpected downtime, we guide you through the uncertainty of change.

Discover	Design	Deploy	Manage
Uptime requirements	Conceptual Design and Space Planning	Equipment Procurement	Future Growth Planning
Site Auditing	Project Engineering (Electrical/Mechanical)	Project Scheduling	Change Control MOPs, SOPs
Load Analysis	Construction Documents/Permitting	Construction Implementation	Preventative Maintenance
Project Estimating Budgets	Coordinated Base Building Integration	Site Commissioning	Continuous eLERT™ Monitoring
Economic Feasibility Study	Lease Review	eLERT™ Implementation	Emergency Response
Project Planning	Monitoring Requirements (eLERT™)	Preventative Maintenance Schedule	Diagnostic Reports

We will be there
when you need us.

The eVOLVE Design-Build Process saves you time and money.

eVOLVE provides turn-key solutions. We coordinate everything so you don't have to. Plus, why pay the additional markup typical of the traditional inter-vendor coordination chain? By bundling project elements under one vendor, eVOLVE streamlines the process for you, improving cost efficiency and quality control.

Your Your
Single Source

Why choose eVOLVE?

- **Turnkey Delivery** – one contract for entire scope of work.
- **Full-Service Capabilities** – comprehensive IT services complement the physical infrastructure capability to provide a full range of data center services.
- **Single Point of Contact** – ensures accountability and ease of operation.
- **Cost Savings** – the design-build process reduces middle-man mark-ups to save you money.
- **24/7 Monitoring** – eLERT™ keeps an electronic eye on your critical systems for your peace of mind.
- **Nationwide Scope** – eVOLVE serves clients throughout the country.

eVOLVE's proprietary eLERT™ Monitoring System takes the pressure off and allows you to remotely monitor your critical infrastructure assets via the internet. It offers:

- Centralized Monitoring
 - Automatic Alarm Notification
 - Continuous Data Trending
 - At-A-Glance System Status
 - Alarm History
 - CCTV Capability
 - Custom Floor Plans
 - Custom Electrical Onelines
 - Custom Mechanical Diagrams

Case Study – Independent School District

Problem: A Local Independent School District needed to implement a new SAN over the summer months to support new projects for the upcoming school year. New hardware was specified and ordered to be installed prior to commencement of the new school year. With the order placed, the site pre-inspection revealed that the existing infrastructure was inadequate to support the electrical load, cooling demand and physical space requirements of the new hardware. Tight budget, compressed schedule, limited space and a complicated relocation dictated an efficient, cost effective solution.

Solution: eVOLVE analyzed the options then designed and implemented a new data center support infrastructure, consisting of critical back-up power, dedicated-redundant cooling and a new floor plan that maximized usable area within the data center.

Result: Within a 30-day window, eVOLVE engineered, permitted and implemented a solution that met the timeline and increased capacity for future growth by 200%. The customer had a fully commissioned and operational facility to support their new data center requirements prior to the beginning of the new school year.
